ABSTRACT

This guide is designed for the second part of a two-part bookkeeping course for adults who are either keeping a set of records for a small business, or who wish to prepare to do so. The following seven lessons are included and are based on a business making retail sales of goods: (1) Introduction; (2) Data Sources and Recording for a Trading Business; (3) Journalizing, Posting, and Trial Balance; (4) Journalizing, Posting, and Trial Balance (continued); (5) Eight-Column Worksheet, and Preparing Financial Statements; (6) Adjusting and Closing the General Ledger, and Preparing the Post-Closing Trial Balance; and (7) Practical Problems. (Lessons 1 through 6 cover about three hours of class time each. Lesson 7 is a practice problem requiring about four class sessions of three hours each.) The appendixes contain illustrations, forms, and solutions to problems; a practical application problem; and tips for teachers of adult classes in small business bookkeeping. (WL)

Documents acquired by ERIC include many informal unpublished attentials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal coducibility are often encountered and this affects the quality he microfiche and hardcopy reproductions ERIC makes available. In the ERIC Document Reproduction Service (EDRS). EDRS is not responsible for the quality of the original document. Reproductions supplied by EDRS are the best that can be made from the original.

FOREWORD

The course described in this instructor's guide, Small Business Book-keeping, Part II, is an adult course for those who are either keeping a set of records for a small business, or who wish to prepare to do so. Students in the course will very likely include those operating their own small businesses and others employed in such businesses.

The scope of a two-part course in small business bookkeeping was determined by an advisory committee which then prepared a general outline of its content. Part I of that course was published in 1973. Part II is contained in this book.

The members of the advisory committee were: Stephen Cumberbatch, Business Education Department, Newtown High School, Elmhurst; George J. Gearhardt, chairman of business education, Guilderland Central High School, Guilderland Center; Bernard Goldhill, Manpower Development Training Program, New York; Frederick G. Smith, chairman, Accounting Department, State University of New York Agricultural and Technical College, Cobleskill; Hobart H. Conover, chief, Bureau of Business Education; E. Noah Gould, associate in continuing curriculum; and Eugene Whitney, associate in business education. Mr. Conover and Mr. Gould were cochairmen of the committee.

The course in this book was written and all accounting problems and illustrative forms were prepared by Helen N. Safford, associate professor, School of Education, State University of New York at Albany. (Part I was also prepared by Professor Safford.) Mr. Gould guided the development and writing of both parts of the course, edited the manuscripts, and prepared them for publication.

Herbert Bothamley, Chief Bureau of Continuing Education Curriculum Development

GORDON E. VAN HOOFT, Director Division of Curriculum Development

MESSAGE TO THE INSTRUCTOR:

The course described in this book is suitable for use in the adult education programs of school districts, of Boards of Cooperative Educational Services (BOCES), and in the community colleges of New York State. Part I (contained in another book) consists of 10 lessons, five problems, and additional illustrative material. The illustrations and problems are based on a dry cleaning business.

Part II (contained in this book) applies the principles covered in Part I, in a more advanced way. It is based on a business making retail sales of goods—a trading business. Those who take Part II should either complete Part I first or have the equivalent in training or experience. Part II contains seven lessons. Lessons 1 through 6 cover about 3 hours of class time each. Lesson 7; however, consists of a practice problem which is likely to require about four class sessions of 3 hours each. An appendix contains an additional practice problem.

Students will probably bring in bookkeeping problems from their jobs or businesses which can add much to the course. You should help them with these problems, and if one of the problems is of general interest, you might wish to explain it to the whole class.

The illustrations, forms, and problem solutions in this course all have figure numbers. In these numbers, the digit to the left of the decimal point is the number of the lesson in which the figure is first discussed. The digit (or digits) to the right of the decimal point show the number of the figure within the lesson. If a figure number has a "K" in it, this means that the figure is an answer key. Some answer keys have more than one page; digits to the right of the "K" show the sheet numbers for such an answer key.

An instructor for this course should be experienced in bookkeeping and, if possible should have teaching experience also. A qualified instructor can usually be obtained from the faculty of a high school, a collegiate school of business, a school of education or other similar schools.

The content of Part II can generally be covered in 10 sessions of 3 hours each, but this pattern is by no means universal, nor is it mandatory. For those students who wish to cover some topics in greater depth, the instructor can suggest materials for independent study.

An instructor or administrator who needs help in planning or conducting a course using this publication may contact the Bureau of Business Education.

HOBART H. CONOVER, Chief Bureau of Business Education

ROBERT H. BIELEFELD, Director Division of Occupational Education Instruction

LESSON 1 INTRODUCTION

Content Outline

Teaching Suggestions and Techniques

Introduction to the Course Have the students introduce themselves and give general comments as to the type of work they do and their previous bookkeeping experience. Establish an informal relaxed atmosphere for the classroom.

Purpose of course

It is assumed that the students enrolled in this Course have taken Part I of Small Business Bookkeeping or have had some previous bookkeeping instruction. Part II of Small Business Bookkeepin is offered for students interested in the records necessary for a trading business. Upon completion of this course a person should be able to keep the records of a small retail trading business.

Note: The term trading business, as used in this course, means a business which sells goods to customers at retail.

Course content

Mention the topics to be covered in Part II and give the students an overview of the course.

Reference materials

Explain to the students that this course is self-contained, with general content and practice problems to apply the concepts learned. The following may be used as general reference for students interested in further reading and practice:

Textbooks

Boynton, Lewis D. and others. Century 21 Accounting, First-Year Course (with key to problems). Cincinnati, Ohio. South-Western Publishing Co. 1972. Chapters 12-20.

Freeman, M.H. and others. Accounting 10/12; 2d°ed. New York, N.Y. McGraw-Hill Book Company. 1973. Part II: Accounting Systems and Procedures, and Part IV: Special Accounting Procedures.

Practice sets

Use a published practice set at the end of this course to provide the students with the experience of using related business papers upon which transactions are based. The following practice sets are suggested: ``

Campers' Cove Business Simulation (with business papers) by Lewis D. Boynton and others. Published by South-Western Publishing Company, 'Cincinnati, Ohio, 1972.

Judd Paint Company, Practice Set for Accounting 10/12, Part II by M.H. Freeman and others. Published by Gregg Division, McGraw-Hill Book Company, 1968.

Supplemental problem

Records of a Typical

Cash received

Service Business

A supplemental practice problem is provided in this book as lessons 7 through 10. Also included are forms to be duplicated by the instructor and keys for the problem.

The time covered by lessons 7 through 10 should be used either for completing a commercial practice set or for doing the supplemental problem.

For review, a motel is used in this book as an example of a service business. Part I of this course is based on a dry cleaning business, another example of a typical service business.

Draw out from the class the sources of cash for a motel business. These sources are:

- 1. Room rentals (the primary source of income for a motel)
- 2. Additional investment by owner
- 3. Sale of old furnishings and equipment

B. Cash paid out

Expense items

II.

Have students describe some of the common items of expense for a motel owner. List them on a transparency or the chalkboard as the students mention them. The list might include items such as:

- room furnishings
- linen service
- utilities
- office supplies and equipment
- salaries
- room maintenance supplies and equipment
- insurance
- grounds care
- land and buildings
- taxes

Show transparencies of Figures 11, Income Statement, and 1.2, Balance Sheet for Sleepy-Time Motel. Review with class and discuss.

III. Records of a Typical Trading Business

The trading business upon which this course is based is a small electrical appliance business (North Star Appliances) at the retail level.

A. Cash received

Generate from the class the sources of cash for a small electrical appliance business. List them on chalkboard or transparency and discuss. The main sources are:

1: Sources of cash

Cash paid cut

- Sale of goods
- Additional investment by owner
- Sale of old store equipment or fixtures

The main source of cash for this business is from the sale of goods to customers.

Elicit from the class the typical expenses of a small retail merchant. Assume that the small electrical appliance store is in a central shopping area and that the owner of the business is renting store space. List the items as students describe them. Typical expense items include:

- Typical expense items
- cost of item sold (cost to merchant)
- heat
- lights (electricity)
- rent
- salaries
- insurance
- telephone
- store fixtures and equipment (display counters, shelves, each register, adding machine; etc.)
- store supplies (wrapping material, office supplies, store supplies)

C. Operation of a small trading business

Discuss with the class the overall operation of a small trading business. Emphasize the following:

- The retail merchant must maintain an inventory of goods for sale to prospective customers.
- Regular store hours must be mainained. This
 generates operating expenses (rent, salaries,
 utilities, etc.) which are relatively fixed.
- The owner of a trading business is in basiness to make a profit and the main source of cash is from the sale of goods to customers.

Show a transparency of Figure 1.3, Comparison of Service Business and Trading Business. Discuss it.

IV. Income Statement, Small Appliance Business

Show a transparency of Figure 1.4, Income Statement, North Star Appliances. Compare Figure 1.4 with the income statement of Sleepy-Time Motel, Figure 1.1.

Point out that an income statement for a trading business differs from that of a service business in that it has a Cost of Goods Sold section, and a Gross Profit on Sales section. Operating expenses are shown after the gross profit, then net profit is shown.

A. General Ledger accounts of a service business

Briefly review the ledger accounts of a service business including assets, liabilities, capital, income, and expenses. Refer to Figures 1.1 and 1.2, if necessary.

B. New accounts needed for a trading business

Describe fully the new accounts by ritle and classification.

1. Merchandise Inventory

Merchandise Inventory is an asset account. This account represents the goods on hand for sale to customers at the time the balance sheet is prepared. The balance of this account is determined by an actual physical count of items on hand (in storage and on the shelves) and is, in general, at cost.

2. Purchases

Purchases is a cost account, listed with the expense accounts. When goods for resale to customers are purchased by the business, the amount paid for the goods is entered as a debit to the Purchases account. The merchant either pays cash for the goods or buys it on credit. The entry to record the transaction would be either

a. Debits and Credits

Debit: Purchases Account Credit: Cash Account

. (cash)

OR

Debit: Purchases Account Credit: Accounts Payable (credit)

Demonstrate in T-account form on chalkboard.

3. Accounts
Payable

Accounts Payable is a liability account. This account represents amounts owed to creditors. When a purchase is made on credit to be paid at a later date, the amount is entered on the credit side of Accounts Payable. The entry to record the transaction would be

a. Debits and Credits

Debit: Purchases (for goods to be resold to customers)

Credit: Accounts Payable

When the amount is paid (at a later date), the entry to record the transaction would be

Debit: Accounts Payable Credit: Cash

Demonstrate in T-account form on chalkboard. Discuss with class and, if needed, briefly review the debit/credit-increase/decrease concept for assets, liabilities, capital, income, and expenses.

1. Sales

Sales is an income account. For a trading business, this account represents the total amount received from the sale of goods (at retail). When a sale is made, the Sales account is credited. The transaction involves receiving cash for the sale of an item and the entry would be

. Debits and \Credits Debit: Cash Credit: Sales

The Why of Income and Cost Accounts

The retail merchant is confronted with the problem of keeping records that will show the cost of doing business. This involves the concept of markup to arrive at a retail price for the goods he sells. The merchant must also maintain accurate inventory and purchase figures. And he must understand how to use these figures to determine the cost of goods sold and to arrive at gross profit.

A. Computation of Cost of Goods Sold

Demonstrate fully, using the chalkboard or an overhead projector, how to compute Cost of Goods Sold.

1. Formula

• Formula:

Beginning Inventory
plus
Purchases

Cost of Goods Available for Sale
minus
Ending Inventory

Cost of Goods Sold

2. Computations

Problem: Find Cost of Goods Sold.

Beginning Inventory (Jan. 1) \$8,600

Ending Inventory (March 31) 7,200

Purchases 8,100

2. Computations

Solution:

Merchandise Inventory, Jan. 1 \$8,600.00
Purchases 8,100.00
Goods Available for Sale \$16,700.00
Less: Mdse Inventory Mar. 31 7,200.00
Cost of Goods Sold \$9,500.00

3. Practice

Have students do the following individually

Problem: Find Cost of Goods Sold.
Beginning Inventory (Jan. 1) \$9,050
Ending Inventory (Dec. 31) 9,600
Purchases 53,192

Answer: Cost of Goods Sold \$52,642.00

Supply more practice problems, if needed.

B. Computation of selling price 1. Markup principles

The markup process is a way of determining the selling price of an item from the cost. In retail businesses, the markup rate for a given item (or kind of item) is usually stated as a policy. Then, for each item, the selling price is computed.

Present and demonstrate the following problem.

A merchant wishes to sell an electric frypan which cost him \$14.00, to realize a gross profit of 30% based on retail selling price. What will be the selling price (S.P.) of the frypan? NOTE: The markup rate is the same as the gross profit.

~

Problem-

Analyze the problem with the class: It gives the cost of the frypan to the merchant, and the desired markup, 30%, based on selling price.

b. Restatement of problem

Cost = \$14.00 Markup (on S.P.) = .30% Selling price = ?

Selfing price (S.P.) = 100%Markup (on S.P.) = 30%Cost must be equal to 70%

c. Solution

Selling price (S.R.) = cost \div 70% = 14.00 \div .70 = \$20.00

d. Checking the result

Check the answer by taking 30% of selling price,
.30 X \$20 = \$6.00
and adding the result (\$6) to cost (\$14) to see if
it proves equal to the selling price (\$20).

· Cost (70%) + Markup (30%) Selling Price (100%) The answer checks.

problem.

Have the students try another problem working individually: What would be the selling price of an electric'

coffee pot that cost the merchant \$8.00 if the markup is 20% based on selling price?

As before, S.P. 100% Markup on S.P.= 20% Cost

> Cost 8.00 ÷ .80

Point out that markup can also be a percent based on cost. Sometimes the manufacturer will have a

suggested selling price or a suggested percent of

Merchandise Inventory is carried on the books as

ment in goods for resale to customers. The merchant owns the goods until they are sold to

an asset account because it represents an invest-

Briefly describe why inventory records are kept.

tory Items, North Star Appliances. This gives examples of some of the items which might be found

Show, a transparency of Figure 1.5, List of Inven-

markup to guide the rétail merchant.

*Solution

Guidelines on

pricing

- Merchandise Inventory
 - Inventory records
 - a. Many items involved

Varietieș of items

Point out that there is a large number of items within an inventory. For example, a small electrical appliance store has a wide range of items and a variety within each item.

customers.

For variety within an item, for example, the retail merchant might carry two or more brands of toasters. Each brand might have two or more sizes or models. Each size or model might have two or more colors (trim, or type of metal). Each of these brands, sizes, and models would probably be a different price.

z. Information needed on record

For each item in inventory, the retail merchant will have a stock inventory record. The record should/show

Stock number of item

in an appliance store.

- Name of the item
- How many are currently in inventory

- Minimum and maximum number to be in inventory
 (a goode for reorder)
- Number sold and dates of sales_
- Number entered into stock and dates

d: Inventory

Show a transparency of Figure 1.6/Inventory Card. Discuss it.

2. Inventory control

maintaining an adequate quantity of goods on hand to satisfy customers. This penerally involves the establishment policy to:

- Centrol—the quantity of hand
- Keep accurate up-to-date records of inventory
- Guard against loss through theft or damage

D. Profit terms

Distinguish the difference between gross profit and net profit.

1. Gross profit

A retail merchant makes his gross profit from selling goods at a price higher than he paid for the goods. Gross profit is found by subtracting the cost of goods sold from net sales.

2. Net profit

Net profit is found by subtracting the expenses of doing business (operating expenses) from gress profit.* Refer back to Figure 1.4, Income Statement, if necessary.

LESSON 2 A DATA SOURCES AND RECORDING FOR A TRADING BUSINESS

Content Outline

Teaching Suggestions and Techniques

Sources of Data for a Trading Business

Problems in narrative form provide practice in recording transactions. But in a real business situation, the bookkeeper must recognize the kind of book entry needed for a given series of events.

The purpose of this section is to discuss the type of business papers that usually support the receipt or payment of cash.

. Cash received
1. Sales Slip (or Sales Ticket)

Explain that there are various procedures used by a small businessman in a trading business to write up a sale. One common procedure is to use a multiple-copy sales slip that is written up at the time of the sale. The original is given to the customer. The copies are kept by the businessman for cash control and control of inventory.

Show transparency of Figure 2.1, Sales Slip, l and discuss it.

Another procedure used is to provide the customer with only a cash register tape (duplicate of tape, is made within the cash register for the businessman). The clerk making the sale will record the information on a form retained by the businessman for cash and inventory control. In this method, the clerk is usually required to make a one-line entry on the form showing date, item (description: model No., color, size), quantity, price, sales tax, and total amount of cash received.

Show transparency of Figure 2.2, Daily Sales Sheet.

Whatever method is used, the business needs written evidence of each sale to verify the cash, sales tax, and total sales. Generally, the business paper generated at the time of the sale is also used to keep a check on inventory. Also, it is good business practice to supply the customer with written evidence (sales slip or cash register tape) for proof of purchase, in case an item purchased has to be returned.

Use of a cash register, with printed tape, provides a chronological record of cash for the day. At the end of the day total cash in the drawer, after subtracting the change fund, should agree with the total cash taken in as indicated by the tape. This amount should also agree with the total amount derived from the duplicate sales slips for the day or the sales summary sheet.

NOTE: Change fund refers to the amount of cash put in the drawer at the beginning of the day to make change. A typical amount for a small trading business is \$50.00.

Point out that other sources of cash for the business might include additional investments by the owner, and the sale of old furniture or equipment of the business. In either case, the cash would probably be in the form of a check. An entry would be made directly into the books followed by a deposit in the bank. This type of a transaction usually would not be handled through the cash register. These sources of cash represent receipts other than from the sale of goods to customers.

b. Purposès

a. Another

procedure

2. Cash register

3. Other sources of cash received

B. Cash paid out

1. Purchase invoice

(Refer back to Lesson I, IV-B.) Discuss with the class the Purchases account and Accounts Payable account including the procedure of buying goods for resale to customers.

The supplier will send a Purchase Invoice to the businessman when the goods are shipped. Show transparency of Figure 2.3, Purchase Invoice.

a. Used for checking goods

When the goods are received by the business, before they are put into inventory, they are checked against the original order and the Purchase Invoice.

b. Basis of book entries

After the goods received and the computations have been verified, the Purchase Invoice becomes the basis for the entries in the books:

Debit: Purchases Account
Credit: Accounts Payable Account

The Purchase Invoice is evidence of money owed; for goods received.

c. Credit termson invoices

At this time, the terms of the invoice would also be noted and a note would be made as to when it should be paid. Review briefly the terms of an invoice and how cash discounts are computed.

Now show Figure 2.3, Purchase Invoice and discuss it. The invoice is dated October 8 and the terms are 2/15, 1/30, n/60.

d. Explanation of terms

If this invoice is paid not later than 15 days from its date (on or before October 23), the businessman can take a 2% cash discount. If it is paid within 30 days of its date (on or before November 7), the businessman can take a 1% cash discount. If it is paid after November 7, no cash discount is given. But the total amount should be paid on or before December 7 (60 days from date of invoice).

Supply more examples, if needed.

e. Summary of Purchase Invoice Summarize the uses of the Purchase Invoice. It is a business paper used by the businessman to

 Verify the goods received (quantity, type, and cost)

- Establish the cost figure for inventory records
- Provide a cost figure for computation of selling price
- Furnish evidence that money is owed to the supplier

Good cash control requires that cash received be deposited in the bank promptly, and cash paid out be in the form of a check. This should be the general rule.

Usually the owner of a small business will maintain a Checkbook in addition to the Combined Cash Journal.

Show transparency of Figure 2.4, Checkbook.

When a check is written, the stub information is entered in the Checkbook, and a current balance maintained. The check supported by the invoice, would then be the business paper, to cause an entry in the cash payments section of the Combined Cash Journal.

At the end of the month, the cash balance in the Checkbook Register would be reconciled with the bank statement. It should also agree with the cash balance of the Combined Cash Journal.

The general rule for good cash control is to issue a check for all cash payments, but some businesses do issue cash from the cash drawer for some bills. For example, in a small grocery business: for daily deliveries such as dairy products and baked goods, cash might be used. In this case, the delivery person prepares an invoice, cash is paid out, and the person receiving the cash signs a receipt. The receipt is written either directly on the face of the invoice or on a separate sheet. It is placed in the cash drawer.

If cash is paid out, a signed receipt must be placed in the cash drawer as evidence of payment. This signed receipt, with the supporting invoice (or bill) then becomes the business paper used to record the payment of cash in the Combined Cash Journal.

Discuss the general concept of a petty cash fund. When cash is paid from the fund a signed receipt is placed in the petty cash box. This signed receipt is called a Petty Cash Voucher.

a. Checkbook

Checks

b. Book entries

3. Signed receipts for cash payments

4. Petty Cash Vouchers Show a transparency of Figure 2.5, Petty Cash

The Petty Cash Voucher is evidence of payment of cash from the fund. When the fund is replenished with cash, the petty cash vouchers together with a summary sheet form the business papers to record the expenses in the Combined Cash Journal.

Petty (Cath Procedures

Purpose of petty cash fund

B. Establishment of the fund

Check issued

Example

Operation of fund

Use of Petty Cash Book

A petty cash fund is established to provide a nominal amount of cash, in a separate fund, for small cash payments. Examples include postage due, package delivery charges, postage, donations ad in local newspaper, and incidental store supplies. This saves writing checks for small amounts.

Discuss with the class that when a fund is established, one person is made responsible for its maintenance. The size of the fund is determined by the needs of the business. It should be large enough to cover small cash expenditures for 2 to 4 weeks. The fund is usually kept in a cash box separate from the regular cash register drawer. Separate records are also kept for the petty cash mmd.

To start the fund, a check is issued from the regular business cash account made payable to cash or petty cash. The check is then cashed and the money placed in the petty cash box.

For example, to establish a petty cash fund for \$50, the journal entry is -

Debit: Petty Cash \$50.00 Credit: Cash

\$50.00

Demonstrate in T-account form on chalkboard. This is merely the transfer of cash from one asset account (Cash) to another (Petty Cash).

Show a transparency of Figure 2,6, Petty Cash Book. Distribute copies of this form to the class.

Demonstrate, using overhead projector or chalkboard, the recording of the \$50 in the Petty Cash Book to establish the petty cash fund. Have the students record the following expenditures in their copies of the Petty Cash Book.

. Petty cash expenditures

•

- D. (Replenishment of the fund
 - 1. Entries in the Combined Cash Journal

Oct. 1. Established petty cash fund, \$50

3. Paid mailman 14* for postage due (mostage)

7. Paid \$4.00 for window washing (miscellaneous)

8. Paid \$4.24 for parcel post charges (postage)

8. Paid \$8.00 donation to Heart Association (donations)

Paid \$5.00 for postage stamps ((postage)

12. Paid \$6.50 for ad in local paper (advertising)

14. Paid \$3.12 for instant coffee, sugar, and powdered cream (miscellaneous)

15. Paid \$4.89 for envelopes, 6 ballpoint pens, and adding machine tape (store supplies)

After they have made the entries, show the students Figure 2.7K, Answer Key, Petty Cash Book. Point out to them the totaling, ruling summarizing, and replenishing of the Petry Cash Book. Use Figure 2.8K, Answer Key, Petry Cash Summary.

Explain that the cash to replenish the pet the cash fund will be the difference between the balance on hand in the fund (\$14.44) and \$50.00. After the fund is replenished it will again have \$50.00 in cash.

The Petty Cash Summary (Figure 2.8K) and the signed Petty Cash Vouchers constitute the business papers for drawing a check to replenish the petty cash fund and to record the transaction in the Combined Cash Journal. The entry in the Journal would be

Debit:

Advertising Expense \$6.50
Donations Expense \$8.00
Postage Expense 9.38
Store Supplies Exp. 4.89
Misc. Expense , 7.12
Credit: Cash

\$35.89

When the \$35.89 check is cashed, the petty cash fund has a balance of \$50.00 cash.

Demonstrate the recording of the cash received (\$35.89) in the Retty Cash Book.

At all times the petty cash fund must have either \$50.00 actual cash or the combination of actual cash plus the total of the signed vouchers equal to \$50.00.

III. Combined Cash Journal for a Trading Business

A. Format

Show a/transparency of Figure 2.9, Combined Cash Journal. Most small businesses use this journal rather than special journals. The Combined Cash Journal is used to record all the transactions of the small business.

1./ Number of columns nemded

The number of columns used in a Combined Cash Journal is flexible. A column can be added whenever there is enough repetition of one kind of entry. It can be eliminated whenever it becomes clear that it is not needed.

B. Recording the transactions of Problem 1

Problem 1 is a selected group of typical transactions for a small appliance business, North Star Appliances. Distribute copies of Figure 2.9, Combined Cash Journal, to the class.

Use chalkboard or overhead projector and present each transaction to the class. Analyze and discuss each transaction, then second it in the Combined Cash Journal with the students recording in their own copies.

While recording the transactions for the North Star Appliances, emphasize to the class the importance of the following:

- Analyze each transaction before recording it.
- In double entry bookkeeping, debits must equal credits. At least two accounts are affected by each transaction.

1. Basic steps

PROBLEM 1
NOVEMBER TRANSACTIONS

Record the following transactions in a Combined Cash Journal.

Nov. 1. Record beginning cash balance \$1,700.00.

1. Paid Central\Mall Association \$220.00 for November rent

2. Cash sales \$246.10 (Sales \$230.00; Sales tax \$16.10)

3. Paid N.Y. Telephone \$31.90, Telephone service

5. Cash sales \$195.17 (Sales \$182.40; Sales Tax \$12.77)

6. Paid Andersen Electric Company invoice, \$288.45, less 1% discount (See Figure 2.3 in Lesson 2.)

6. Payroll, net cash paid \$202.25

Distribution for recording:

Salary expense

Salary expense \$245.30
Federal income tax 22.90
State income tax 5.80
FICA tax 14.35

- Record employer's FICA tax expense \$14.35.
- 7. Cash sales \$419.44 (Sales \$392.00; Sales tax \$27.44) 10. Cash sales \$289.97 (Sales \$271.00; Sales tax \$18.97)
- Received credit memorandum for \$21.60 from Skiff's Electric for a damaged roaster oven returned for credit (Roaster oven was badly damaged when received.)
- 12. Paid 60-day \$1,000.00 note due today with interest at 8% (Notes payable
- 12.1 Cash sales \$205.44 (Sales \$192.00; Sales tax \$13.44)
- 13. Payroll, net cash paid \$202.25

Distribution for recording:

Salary expense \$245.30 Federal income tax -22.90 State income tax 5.80 FICA tax · \ 14.35

Record employer's FICA tax expense \$14.35.

Paid Diamond Electric invoice for \$106.00 for merchandise purchased on account

14. Cash sales \$271.78. (Sales \$254.00; Sales tax \$17.78)

15. Purchased \$176.00 worth of merchandise from Andersen Electric Company on account, terms 2/15, 1/30, n/60

Mr. North, owner, made an additional investment in business of \$1,200.00

17.

Sash sales \$334) 70 (Sales \$310.00; Sales tax \$21.70)
Issued check of replenish the Petty cash fund. The Petty cash summary .18. sheet shows the following distribution:

> Advertising expense \$14.40 Donations 10.00 Postage 5.00 Miscellaneous 11.00 Cash needed -\$40.40

18. Purchased \$268.00 worth of merchandise from Diamond Electric Company on account

20. Payroll, net cash paid \$202.25 Distribution for recording:

Salary expense \$245.00 Federal income tax 22,90 State income tax 5.80 FICA tax

Record employer's FICA tax expense \$14.35. 20.

Cash sales \$234.33 (Sales \$219:00; Sales tax \$15.33)

23. Paid, \$21.36 to local PRUDENT SHOPPER for 4-inch ad on special holiday sale

25. Mr. North, owner, withdrew \$500.00 cash for personal use.

25. Cash sales \$175.48 (Sales \$164.00; Sales tax \$11.48)

29. Paid Andersen Electric Company invoice \$176.00, less 2% discount

30. Prepare a cash proof from Combined Cash Journal. Checkbook shows a cash balance of \$2,271.62.

LESSON 3 JOURNALIZING, POSTING, AND TRIAL BALANCE

Content Outline

Record the Transactions of Problem 1. (continued)

II. Summarize the Combined Cash Journal.

Teaching Suggestions and Techniques

Briefly review the transactions recorded in the Combined Cash Journal from Jesson 2. Finish journalizing Problem 1, using the pattern already established. Allow time for questions and discussion.

Using the chalkboard or overhead projector, demonstrate the procedure for footing and ruling the Journal.

Emphasize the importance of accuracy in adding the columns, proving the equality of the debits and credits, and preparing a cash proof. The balance of cash should agree with the balance in the checkbook, which in turn is reconciled to the bank statement.

Refer to Figure 3.3K, Answer Key, Combined Cash Journal for November, and Figure 3.4K Answer Key, Cash Proof, November 30.

III. Open and Post the General Ledger.

A. Two-Column General Ledger

> 1. Opening the General Ledger

Show a transparency of Figure 3.2, General Ledger. Review the purpose of the General Ledger and the overall procedures for posting it.

Provide the students with copies of the blank General Ledger form (Figure 3.2).

Demonstrate the opening of the General Ledger Accounts, using Figure 3.1, Chart of Accounts, worth Star Appliances, which shows account balances. Have students set up their Ledger accounts.

Direct this process, at least for the first few accounts, then carefully supervise as the students work independently.

2. Posting for November

Demonstrate the posting procedure and have students work with their own Journal and Ledger accounts. Allow time for questions and discussion.

a. Steps in posting

While working together, emphasize:

• That the proper steps should be used in transferring information from Journal to Ledger.

- For example, in posting the total cash debit
 - (1) Locate the Cash General Ledger accounts
 - (2) Record in Ledger (debit side) amount, date, and posting reference. (Use CJ for Combined Cash Journal.)
 - (3) Record in the Journal at foot of cash debit column the record posting reference 101, which is the Cash Ledger account number.
- That the column heading in the Journal indicates to which account each item in that column should be posted. Also whether it is a debit or a credit.
- That most columns are posted in total to the Ledger account indicated. But a figure in the General Ledger debit or credit column requires that that amount be posted to the account manual in the "Account Title and Explanation" column.
- That all posting be done carefully and accurately.
- Using the chalkboard or overhead projector demonstrate the procedure for computing account balances. Do not show computations in the Ledger account but only small pencil footings. Show the balance on the proper side of the account. (See

Figure 3.4K, Answer Key, General Ledger, November.)

Provide a copy of a Trial Balance form for each student. Briefly review the purpose of a trial balance and how it is prepared.

Show how to prepare a Trial Balance for North Star Appliances for November, with students working individually on their own materials. (See Figure 3.6K, Answer Key, Trial Balance, November 30.)

Now allow time for questions and discussion.

Lesson 4 provides transactions for December on which students should work independently to journalize, post, and take a trial balance.

b. Account to be posted

- c. Importance of accuracy
- 3. Computing account balances

Prepare the Trial Balance.

Answer questions.

LESSON 4 JOURNALIZING, POSTING, AND TRIAL BALANCE (continued)

Content Outline

I. Review Problem 1.

Teaching Suggestions and Techniques

This lesson is a reinforcement of journalizing, posting, and preparing a trial balance. The students are to work independently.

Review the work finished for November transactions in Problem 1. Point out to the students that their trial balance for November 30 must be in balance since Problem 3, December transactions, will be posted using that balance as a base.

II. Problem 2, December Transactions

A. Journalize.

Distribute copies of the Combined Cash Journal form (Figure 2.9) and have the students journalize December transactions. Also give them copies of Problem 2, December Transactions, which appears at the end of this lesson.

Have students work independently with a minimum of assistance. But you should supervise the activity and make suggestions where appropriate.

When the students are finished, check the results against Figure 4.1K, Answer Key, Combined Cash Journal, December Transactions. Discuss with class and answer questions.

Briefly review the posting procedure used for November transactions.

Have student's post their December Journal entries to their General Ledger accounts and compute the account balances. Check the results against Figure 4.2K, Answer Key, General Ledger.

Note: You may prefer to have students prepare a Trial Balance first and then check it against the answer key.

Review the Trial Balance. Distribute copies of a Trial Balance form and have the students prepare a Trial Balance for December 31.

When they are finished, check the results against Figure 4.3K, Answer Key, Trial Balance, December 31.

B. Post to General Ledger.

C. Prepare Trial Balance.

- D. Review the December entries 4
- Discuss with the students the work completed for December for North Star Appliances. Point out that most small businesses will have a periodic routine of journalizing, posting to the ledger, and preparing a Trial Balance.
- E. Timing of the operations
- Journalizing is done either daily or as transactions occur.
- Posting is usually done at least once a month. It is helpful to post individual items from General Ledger debit and credit columns during the month to keep accounts current.
- A Trial Balance is usually prepared monthly to give the bookkeeper a periodic check on the equality of debits and credits in the General Ledger.

PROBLEM 2 DECEMBER TRANSACTIONS

Record the following transactions in a Combined Cash Journal.

- Dec. 1. Beginning cash balance \$2,271.62
 - 1. Paid Central Mall Association \$220.00 for December rent
 - Paid N.Y. Telephone \$34.30, telephone service
 - 2. Cash sales \$230.05 (Sales \$215.00; Sales tax \$15.05)
 - 3. Purchased \$449.00 worth of merchandise from Andersen Electric Company on account; terms 2/15, 1/30, n/60
 - 4. Cash sales \$205.44 (Sales \$192.00; Sales tax \$13.44)
 - 4: Received a credit memorandum for \$10.90 from Diamond Electric for broken electric iron returned for credit
 - Cash sales \$220.42 (Sales \$206.00; Sales tax \$14.42)

Payroll, net cash paid \$202.25

Distribution for recording:

Salary expense \$245.30
Federal income tax 22.90
State income tax 5.80
FICA tax 14.35

- 7. Record employer's FICA tax expense \$14.35.
- 8. Cash sales \$310.30 (Sales \$290.00; Sales tax \$20.30)
- 9. Paid Diamond Electric Company invoice \$268.00, less \$10.90 per credit memorandum
- 10. Paid \$23.00 to local PRUDENT SHOPPER for a 4-inch ad on special holiday sale
- 11. Mr. North, owner, withdrew \$500.00 cash for personal use.
- 12. Cash sales \$331.70 (Sales \$310.00; Sales tax \$21.70)

14. Replenished petty cash fund. The petty cash summary sheet shows the following distribution:

Advertising expense	•	\$ 8.00
Donations		15.00
Postage		7.80 /
Miscellaneous	٠.	12.00
Cash needed		\$42.80
*** * ***		

15. Payroll, net cash paid \$202.25 Distribution for recording:

Salary expense	\$245.30
Federal income tax	22.90
State income tax	5.80
FICA_tax	° 14.35
3	**

15. Record employer's FICA tax expense \$14.35.

15. Cash sales \$353.10 (Sales \$330.00; Sales tax \$23.10)

16. Paid Andersen Electric Company invoice \$449.00, less 2% discount

18. Paid \$44.80 to Utility Electric Co. for electrical service for 2-month period

23. Cash sales \$434.42 (Sales \$406.00; Sales tax \$28.42)

28. Paid Skiff Electric invoice for \$310.00, less 1% discount for merchandise purchased on account

30. Cash sales \$171.20 (Sales \$160.00; Sales tax \$11.20)

31. Prepare a cash proof from Combined Cash Journal. Checkbook shows a cash balance of \$2,354.83.

LESSON 5 EIGHT-COLUMN WORKSHEET, AND PREPARING FINANCIAL STATEMENTS

Content Outline

Teaching Suggestions and Techniques

Review of Problem 2

Briefly review the independent work from Lesson 4, December Transactions for North Star Appliances.

- II. The 8-Column Worksheet
 - Introduce the Worksheet, ·

Show a transparency of Figure 5.1, 8-Column Worksheet. Distribute copies of this worksheet to the class and discuss its purpose. Emphasize that:

- It is a bookkeepers' tool, prepared from General Ledger balances for end-of-accounting-period analysis and adjustments. It is prepared in pencil and is not part of the formal financial papers.
- A step-by-step process must be followed in preparing it.
- When completed, it is a good basis for preparing financial statements and journalizing adjusting and closing entries.
- Prepare a Worksheet.

Working with the class, demonstrate the preparation of an 8-Column Worksheet for North Star Appliances for the year ended December 31, 19 ... (See Figure 5.2K, Answer Key, 8-Column Worksheet. December 31, 19 .)

1. Fill in headings. Fill in main heading and the column headings. Point out that each pair of columns (Trial Balance, for example) has a debit column and a credit column.

Enter Trial Balance.

A Trial Balance has already been prepared for December 31. Point out that if a Worksheet is used, the bookkeeper probably would not prepare a separate Trial Balance but would enter it directly on the Worksheet from the ledger accounts.

Working with the class enter the trial balance on the Worksheet. Add the columns to be sure debits equal credits.

III. Adjustments on the Worksheet

Adjustments needed for North Star Appliances for December 31, 19 are as follows:

Adjustments needed

- Physical count and pricing of the merchandise on hand shows a balance of \$8,640.00 in merchandise inventory.
- Value of prepaid insurance that has expired , is \$174.00.

- Physical count and pricing of store supplies shows a total of \$140.00 worth on hand.
- Depreciation expense on store fixtures and equipment is \$260.00.
- B. The concept of adjusting ledger accounts

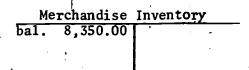

Discuss with the class the concept of adjusting certain ledger accounts to show true balances.

Use chalkboard or the overhead projector and present each adjustment to the class. Analyze and discuss each adjustment, then enter it in the Adjustments column on the Worksheet. The students should be making entries on their own Worksheets.

C. Adjustment of Merchandise Inventory The first adjustment, the Merchandise Inventory account, must show the new balance of \$8,640.00. We suggest the two-entry method for adjusting: (A) remove the old balance, (B) record the new balance.

1. Starting balance

Start with the balance shown on the Trial Balance, as illustrated in the T-account form:

The other account involved in the adjustment is the Profit and Loss Summary Account:

Profit and Loss Summary

(no balance on Trial Balance)

2. First adjusting entry

The first adjusting entry will remove the old balance from Merchandise Inventory account:

Adjusting entry (A)

Debit: Profit and Loss Summary \$8,350.00 Credit: Merchandise Inventory \$8,350.00

Second adjusting entry The second entry will record the new balance in the Merchandise Inventory account:

Merchandise Inventory bal. 8,350.00 (A) 8,350.00 (B) 8,640.00

> Profit and Loss Summary 8,350.00 (B)

Adjusting Entry (B)

Debit: Merchandise Inventory \$8,640.00 Credit: Profit and Loss Summary \$8,640.00

Balance after adjustments

After the adjustment, Merchandise Inventory shows a debit balance of \$8,640.00, the new amount.

Point out that each adjustment entered on the Worksheet has a capital letter to identify the debit adjustment with the credit adjustment.

- Adjustment of Prepai Insurance
- The (C) adjustment is to the Prepaid Insurance account and the insurance accounts.
- 1. Starting balance

Using T-accounts show the balance as listed on the Trial Balance:

		Insurance	-
bal.	360.00		

Insurance Expense

:\$174.00 of the prepaid insurance has expired-that amount of the prepaid premium applies to this accounting period. Therefore, that amount is recorded as an expense of this accounting period.

Discuss in full, using a specific example, to be sure the students understand how expired insurance is computed.

Adjusting entry. The entry to record the expired insurance for North Star Appliances is:

	Prepaid 1	nsurance	
bal.	360.00	(C)	174.00
		1	

Insurance Expense 174.00

Adjusting Entry (C)

Debit: Insurance Expense \$174.00

Credit: Prepaid Insurance \$174.00

3. Balance after adjustment

After/adjustment, the Prepaid Insurance account shows a balance of \$186.00 and Insurance Expense a balance of \$174.00.

E. Adjustment of Store Supplies

The (D) adjustment concerns the Store Supplies account and the expense account, Store Supplies Expense.

1. Starting balance The balances in T-account form as shown on the Trial Balance are:

Store Supplies
bal. 285.00

Store Supplies Expense

The balance of store supplies on hand as of December 31, 19_ is \$140.00, which means \$145.00 worth of store supplies were used during the accounting period. The \$145.00 would be the expense for the period for store supplies.

2. Adjusting entry The adjustment entry to record this expense is:

Store Supplies
bal. 285.00 (D) 145.00

Store Supplies Expense
D) 145.00

Adjusting Entry (D)

Debit: Store Supplies Expense \$145.00 Credit: Store Supplies \$145.00

F. Adjustment for depreciation

The last adjustment is for depreciation. Discuss the concept of depreciation using a specific example.

Depreciation is the (E) adjustment and involves Accumulated Depreciation--Store Fixtures and Equipment account and the Depreciation Expense account.

Starting balances

Balances of these accounts as listed on the Trial Balance shown in T-account form are:

Accumulated Depreciation--Store Fixtures and Equipment

bal. 1,300.00

Depreciation Expense

The depreciation adjustment of \$260.00 represents the estimated decrease in the value of the store fixtures and equipment that is to be recorded as an expense for this accounting period.

Adjusting entry

The entry to record this expense is:

Accumulated Depreciation --Store Fixtures and Equipment

> bal. 1,300.00 (E) 260.00

Depreciation Expense 260.00

Adjusting Entry (E)

Debit: Depreciation Expense \$260.00 Credit: Accumulated Depreciation --

Store Fixtures and Equip. \$260.00

Balance after

The new balance in Accumulated Depreciation account ____adjustment____is \$1,560.00

> If time permits, discuss with the class the significance of the asset account, Store Fixtures and Equipment, and the minus asset account, Accumulated Depreciation.

After the last adjustment is entered on the Worksheet, add the adjustments columns to be sure the debits equal the credits, and make double lines where needed.

Extend amounts to Income Statement columns and Balance Sheet columns.

Demonstrate how each item is extended from the Trial Balance (combined with the adjustments) to either the Income Statement columns or the Balance Sheet columns according to the classification of the account.

1. Example

For example, for the cash account, debit balance \$2,354.83 (no adjustment), the amount is extended to the Balance Sheet debit column.

 Demonstrate on Merchandise Inventory. Do each item individually and systematically. The first item with an adjustment is the Merchandise Inventory account. Demonstrate fully how the new balance is determined and extended to the Balance Sheet debit column.

H. Compute net profit
(or loss) and finish
the Worksheet

Working with the class, demonstrate the completion of the Worksheet.

1. Total the columns.

Total the Income Statement columns and the Balance Sheet columns. Examine the Income Statement column totals. Is the credit total (\$75,527.88) greater than the debit total (\$63,338.84)? Since it is, there is a net profit for the period. Income is greater than expense.

2. Determine the net profit.

Subtract the lesser amount from the greater amount and the difference (\$12,189.04) is the net profit, for the period. The difference between the two Balance Sheet column totals should be the same amount as the net profit (\$12,189.04).

Enter the net profit.

Enter the net profit, bring down the final totals, and double rule the Worksheet. Point out that the net profit (or loss) figure is used as a balancing figure.

IV. Preparation of Financial Statements

A. Balance Sheet

Using the completed Worksheet, Figure 5.2K, prepare a Balance Sheet for North Star Appliances as of December 31, 19 . (See Figure 5.3K.)

B. Income Statement

Using the completed Worksheet, Figure 5.2K, prepare an Income Statement for North Star Appliances for the year ended December 31, 19__. (See Figure 5.4K.)

C. Summary

Point out to the class that the net profit figure on the Income Statement is also shown in the Owner's Equity section of the Balance Sheet.

Allow time for questions and discussion of the work completed to date.

LESSON 6 ADJUSTING AND CLOSING THE GENERAL LEDGER, AND PREPARING THE POST-CLOSING TRIAL BALANCE

Content Outline

Teaching Suggestions and References

I. Review of Worksheet

Briefly review the Worksheet that was completed in Lesson 5. Remind the students that the financial statements were prepared from the Worksheet and that the information on the Worksheet will be used to journalize the adjusting and closing entries.

- II. Adjusting and Closing Entries
 - A. Adjusting entries
 1. Journalizing

Distribute copies of the Combined Cash Journal. (Figure 2.9) to the class. Review the adjustments that were made on the Worksheet for North Star Appliances and the manner in which each adjustment is keyed.

Working with the class, demonstrate the journalizing of the adjusting entries starting with adjustment (A). (See Figure 6.1K.)

2. Posting to Ledger

After the adjusting entries are journalized, post them to the General Ledger accounts.

Have the students compute the account balances for the accounts involved with adjustments. Make sure that each balance agrees with the balance shown on the financial statements and/or the extended balance on the Worksheet.

B. Closing entries
1. Results of
closing entries

Discuss with the class the purpose of closing entries. As a result of closing entries, three things are accomplished:

- Income accounts are closed (in balance).
- Expense accounts are closed (in balance).
- Net profit (or loss) is transferred to the capital section (in agreement with the financial statements).
- 2. Closing entries needed

To close the General Ledger for North Star Appliances, make four closing entries (Figure 6.1K):

- Transfer income to Profit and Loss Summary account.
- Transfer expenses to Profit and Loss Summary account.
- Transfer net profit (or loss) from Profit and Loss Summary account to the Drawing account.
- Transfer the net increase (or decrease) from the Drawing account to the permanent Capital account.

Journalizing

Demonstrate the journalizing of the closing entries, working from the Worksheet. The concept can be clearly illustrated first in T-accounts before actually journalizing.

Posting to Ledger Have the students post the closing entries te their General Ledger accounts. When the posting is completed, have them compute account balances. to be sure the temporary accounts are in balance, that is, closed.

Balancing and ruling the General Ledger accounts

Briefly review the classification of accounts in the Ledger. Point out that the permanent accounts (Balance Sheet accounts) are balanced and ruled, but a balance is also shown for the beginning of the new accounting period. The temporary accounts (income and expense accounts) are closed (without balances) to start the new accounting period.

Demonstrate balancing and ruling the General Ledger for North Star Appliances. (See Figure 6.2K.)

Post-Closing Trial Balance

Distribute a Trial Balance form and have the students prepare a Post-Closing Trial Balance (Figure 6.3K). Make sure debits equal credits in the Ledger after the closing procedures.

Review the accounting cycle, emphasizing that it is repeated each accounting period. Allow time for questions and discussion of the work completed.

PRACTICAL PROBLEM

Content Outline

Teaching Suggestions and Techniques

Purpose of Application

In Lesson 1, we recommend that a published practice set be used at the end of this course. This will provide the students with experience in using the related business papers upon which transactions are based. Several commercially published practice sets are suggested in Lesson 1.

Alternate application

If you prefer, you can use the supplemental practice problem (SNO SHACK, Appendix B) in place of a published practice set. This supplemental problem includes transactions for December plus

the closing for the end of the year. It also includes forms (which can be duplicated) and answer keys for the problem.

We estimate that four class sessions would be an appropriate amount of time to devote to completing either a practice set or the supplemental problem.

II. Procedure

In using either a practice set or the supplemental problem, we recommend that you do the following. (In the statements below we will assume you have chosen to use the practice set.)

A. First do the practice set yourself.

Do the practice set yourself before you assign it: to the students. As you do it, notice:

- What the student will need to work the practice
- The type of entries which might give the student problems
- The time required to complete the set
- with the students.

Review the materials. Review the practice set with the student's before they work it to emphasize:

- Type of business involved
- Task the student is confronted with
- Time schedule to be followed
- Provide check figures.

Provide check figures at key points. For example: Journal totals, Trial Balance totals, net profit (or loss) figures, etc.

D. Make your completed set available.

Make your completed practice set available as an answer key while the students are doing their sets.

III. Summary

Review with the students the bookkeeping cycle and the role of the bookkeeper and/or accountant in the small business environment.

APPENDIX A ILLUSTRATIONS, FORMS, AND SOLUTIONS TO PROBLEMS
